

MILOŠ STOJANOVIĆ

Frontend Developer (React, Next.js, TypeScript) — Open to Remote

Bijeljina, Bosnia and Herzegovina | stojanovic98m@gmail.com | +387 66 750 813 | miloss98.dev | linkedin.com/in/miloss98 | github.com/miloss98

PROFILE

Frontend Developer with 4 years of professional experience building and shipping production web applications with React, Next.js, and TypeScript. Comfortable owning features end-to-end — from architecture and performance to deployment — and fluent with AI-assisted development tools (Copilot, Cursor, Claude Code) to ship faster without cutting corners. Currently expanding into backend development (Node.js, Express, PostgreSQL) to work full-stack. Experienced collaborating with international, remote-first teams. Open to remote roles and on-site opportunities in Bosnia and Herzegovina or Serbia.

WORK EXPERIENCE

Frontend Developer — Rhapsody Media (UK-based)

June 2022 – Present

- Rebuilt and optimized key pages, improving Lighthouse performance score from ~60 to ~90 (a ~30% improvement)
- Shipped customer-facing features and pages used by 500+ users, working closely with design and backend teams
- Architected and built the company website from the ground up using Next.js and Strapi (headless CMS), implementing code splitting and lazy loading for scalability and performance
- Improved code quality and maintainability by introducing a reusable component library and stricter TypeScript types, significantly reducing bugs and development time
- Built a data-driven calculator application with interactive charts and PDF report generation using Chart.js
- Optimized SEO and implemented structured data, improving website search rankings and visibility
- Collaborated in an agile team, contributing to sprint planning and code reviews for a team of 9 engineers
- Used AI-assisted development tools (GitHub Copilot, Cursor) to speed up implementation while maintaining code quality standards through review and testing

PERSONAL PROJECTS

GarageLog — Full-Stack Car Maintenance Tracker

Live project · Built solo, end-to-end, from concept to production

- Designed, built, and deployed a full-stack web app for tracking vehicle service history and maintenance schedules
- Built with Next.js, TypeScript, Supabase, Tailwind CSS, shadcn/ui, and Zustand — covering frontend architecture, database design, authentication, and deployment
- Currently rebuilding the backend from scratch (Express.js, Sequelize, PostgreSQL) to replace the Supabase layer with a custom-built API

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), Astro, Tailwind CSS, shadcn/ui, Material UI, Chakra UI, Sass/SCSS, Responsive Design, Web Accessibility (WCAG)

State, Data & APIs: Zustand, Redux Toolkit, React Query (TanStack Query), React Context API, React Hook Form, Zod, Axios, REST APIs, GraphQL, Chart.js, Highcharts

Backend (currently expanding): Node.js, Express.js, Sequelize (ORM), SQL, PostgreSQL, Supabase

Testing: Jest, Vitest (in progress)

AI Tools: GitHub Copilot, Cursor, ChatGPT, Gemini, Claude Code (certified)

Methodologies: Agile, Scrum, Code Review, Sprint Planning

CMS & Content: Strapi, Sanity

Tools & Workflow: Git, Vite, Vercel, Netlify, Figma, npm, Yarn, ESLint, Prettier

EDUCATION

Bachelor's Degree, Computer Science — Sinergija University, Bijeljina | 2018 – 2022

LANGUAGES

Serbian (Native) | English (Proficient)
